VicForests Operations Comply so Friends of Leadbeater's Possum Submit New Claim

The Federal Court has today formally issued orders which reject the basis of the claim brought by FLBP against VicForests.

"The initial hearing found VicForests operations were not affected by government-to-government delays in reviewing the Central Highlands Regional Forest Agreement (RFA)," said VicForests CEO Nathan Trushell.

FLBP have now amended their Statement of Claim to allege that VicForests operations in a number of coupes are not being conducted in accordance with the Central Highlands RFA because they have not complied with the State based regulatory regime.

He said of the new claims: "We are confident our operations comply with the State regulations and will be defending this new claim."
